Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, 37-72 and 74, drawn to a process for producing an active transglutaminase, classified in class 435, subclass 193.
- II. Claims 36, 73 and 75, drawn to a transglutaminase, classified in class 435, subclass 193.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. Invention II reads on a transglutaminase with the given characteristics made by any process whatsoever. Just because claims 36 and 73 claim that it is made by the process of Invention I, the enzyme made or obtained by any process reads on the claims. Claim 75 does not claim any particular process by which the enzyme is made.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
